**MUSASHI**  
**JOINT SUPPORT**  
**GLUCOSAMINE HCL 750mg**

Each capsule contains:  
Glucosamine hydrochloride 750mg

60 capsules Aust L 76997

**Description**  
Glucosamine is one of the building blocks of glycosaminoglycans, the main component of cartilage. Glycosaminoglycans are found in all connective tissues, attracting and maintaining water molecules, which help maintain healthy cartilage. Glucosamine is useful for improving the symptoms of osteoarthritis, including reducing joint pain, swelling and tenderness, thereby increasing mobility and movement in affected joints. If symptoms persist, seek the advice of a health care professional.  
Derived from seafood.
